scores

Reading Box-and-Whisker Plots

The box-and-whisker plot below represents scores earned on a science test.

1. According to the plot, what is the median test score?
   75 points

2. According to the plot, what percent of scores are less than 75 points?
   50%

3. What statement is not true about the box-and-whisker plot?
   - 85 represents the upper quartile
   - 100 represents the maximum score
   - 75 represents the mean score
   - 55 represents the minimum score
